

COVID-19 SPECIALISED CLEANING SOLUTIONS

Curtail the spread of Covid-19. Support safe workplaces. Reduce operational costs.

Tsebo Cleaning and Hygiene Solutions has launched an emergency cleaning service in response to the COVID-19 pandemic. As the government introduces phased measures to resume economic productivity, Tsebo offers fast turnaround times on COVID-specific cleaning solutions for employers to clean, decontaminate and sanitise their workspaces for the safe return of staff.

THE CHALLENGE

Under normal circumstances work surfaces are covered with large numbers of disease carrying causing pathogens. As a result of the COVID-19 pandemic, people have become more aware of the risks presented by pathogens as well as their prevalence on shared surfaces.

To maintain productivity, employees need to feel safe. This places pressure on employers to ensure that workers feel confident to return to a work environment that is clean and decontaminated.

Employees should wash their hands regularly and use hand sanitiser after contact with office apparatus. All surfaces should be sanitised and procedures should be put in place to deep-clean floors and work spaces.

THE SOLUTIONS

COVID-19 specialised cleaning and disinfection

Knowing that a staff member has contracted the COVID-19 virus can be stressful for employers and employees and raises the question of where the contact took place. Employers need to act swiftly so as not to raise alarm.

Tsebo Specialised Services has the knowledge and experience to deal with stressful situations. Our teams are trained to systematically clean and disinfect the facility to ensure all surfaces and critical touchpoints are sanitised and treated with the correct chemicals and methodologies. That means door handles, light switches, keyboards, the backs and arms of chairs, plus all horizontal surfaces, like tables, countertops and desks.

- Rapid and effective response to ensure employee's safety and morale.
- Workspace can be re-occupied in a short timeframe.

Approved, certified and environmentally friendly chemicals that contains antimicrobial agents.

**WE DEVELOP PEOPLE,
TO SERVE PEOPLE,
TO UPLIFT SOCIETY**

Electrostatic disinfection

Our specialised electrostatic disinfection and cleaning solution use technology to deep clean and disinfect every millimetre of surface and hard-to-reach space. An electrostatic sprayer is used in conjunction with a broad spectrum virucidal, bactericidal and fungicidal disinfectant. As the solution leaves the sprayer it is electrically charged, ensuring better adherence to all sides of surfaces and a more even distribution, resulting in better disinfection.

- Active steps taken by employers to ensure employee safety increases staff morale.
- The facility is available for work in a short timeframe.

PASSIONATE ABOUT EMPOWERMENT

With a purpose statement of: “we develop people, to serve people, to uplift society” as well as a deeply ingrained understanding of operating in local communities through successful Joint-Venture (JV), Public Private Partnerships and Local Supply Chain and Enterprise Development Programmes, Tsebo understands the power of ‘Ubuntu’ – united against the spread of the pandemic.
