

CLEAN CLASSROOMS, SPOTLESS LEARNING

Scientific approach. Global best practice. Risk reduction.

Educational facilities prioritise both mental and physical wellbeing alongside intellectual growth. Partner with a trusted cleaning service to prevent pathogen cross-contamination for safe, healthy environments.

Tsebo excels as an expert within the education sector, crafting solutions that are perfectly suited to the unique demands of classroom environments. Our deep understanding of educational needs enables us to customise our services to meet the specific requirements of our clients. This expertise provides educators with the assurance they need to conduct on-site teaching, ensuring that the interactive and hands-on essence of learning is preserved without any compromises.

THE CHALLENGE

Universities, colleges, schools and childcare facilities are by nature high-touch environments where interactions between teachers and learners, and learners and their peers, are all part of the educational experience – whether in the classroom, on the playground or the sports field.

Sporting facilities and equipment, as well as practical laboratories or studios and recreational facilities are touched by hundreds of hands each day and there is no guarantee that everyone is observing strict hygiene protocols, such as regular hand-washing and sanitation. The tactile nature of these interactions leaves educational environments susceptible to cross-contamination and viral or bacterial breakouts.

In addition, specialised environments, such as computer and science laboratories, need a specific approach to cleaning to ensure that equipment is not compromised or damaged.

OUR SOLUTION

Tsebo conducts a risk and needs assessment to provide tailored solutions for clients based on the layout of their premises, school times and traffic volume per area. This includes looking at the specialised cleaning and hygiene requirements of indoor and outdoor areas, high-traffic, high-touch areas such as classrooms, as well as sanitary and play or pause areas. Cleaning plans are tailored to minimise interference with the educational facility's timetable and activities.

Tsebo employs the the Science of Cleaning and Hygiene to ensure that the correct chemicals, fit-for-purpose equipment and cleaning methodologies are used according to whether an area poses a low, medium or high risk, with a continuous focus on infection prevention.

Our solutions include:

- Day-to-day cleaning and disinfection of surfaces and touchpoints in line with best practice
- Specialised Cleaning includes a wide variety of services such as the restoration and grinding of marble and natural stone floors, carpet cleaning, kitchens and canopy cleaning, ablution deep cleaning, IT cleaning and disinfection, emergency cleaning after flood damage and high-level window cleaning (above 2m) using advanced methodologies
- Specialised cleaning (pre-occupation and rapid response cleaning in the event of an outbreak)
- Our consumables are certified and approved . We adopt a flexible ordering methodology that enables Clients to limit their monthly spend and order consumables on an adhoc basis.

THE BENEFITS

Tsebo's infection prevention practices and products that have been adopted with years of experience in the healthcare sector gives learners and educators increased confidence of being in a safe and healthy environment. The results will include:

- ✓ Promoting health and wellbeing to reduce absenteeism
- ✓ A better and more productive learning experience
- ✓ Maintenance and up-keep of your facilities that will positively influence your brand assets
